Published by

MANCHESTER DISTRICT OF THE
ENGLISH FOLK DANCE AND SONG SOCIETY

MARCH 1983

INTRODUCTION 2020

'Clogmakers - A Directory' was written by Duncan Broomhead and published by the Manchester District of the English Folk Dance and Song Society in March 1983. The majority of the clogmakers listed in the booklet are no longer making clogs, but new makers have taken up the trade. Address and telephone details may no longer be up-to-date for any that are still in the trade, and are provided for the benefit of researchers only. Please do not use details in this booklet to contact any clogmakers or the author. Contact details for current clogmakers are likely to be available on the internet.

This booklet remains of interest as a record of the clogmakers or cloggers in the trade in the early 1980s. Furthermore it gives examples of the crimps used by several of the clogmakers, and these may be of use for identification of clogs made in that period if the maker is unknown.

Names marked with * were not active clogmakers in 1983, and further explanation is given with each entry in the booklet.

Michael L. Jackson, Adlington, Lancashire, December 2020.

Clogmakers Documented in March 1983 Edition

Aaron, Ben - Halifax
 Alstons (P. H. Jones) - Preston

 Watson, Bruce - Shrewsbury *
 Watson, T. - Carlisle *

INTRODUCTION

Whilst publishing a Newsletter for Morris and Step Dance sides in the Greater Manchester area for the English Folk Dance and Song Society, it became apparent that there was a need for up to date and detailed information on the current clogmakers.

There were a number of lists in circulation some containing details that proved to be 20 years out of date and it is that problem that I have tried to rectify with this illustrated address list.

I have included a lot of details about what is available from each clog-maker but give no details regarding prices as I felt that with the ever increasing cost of raw materials etc., this information would soon be out of date. As a general rule readers will find that, not unexpectedly, handmade clogs are between 50 and 100 % more expensive than those made with factory uppers.

All the information published here was gathered between late 1981 and Spring 1983 and the details are those given by the clogmakers themselves in answer to a standard set of questions. Illustrations of the various crimps are given for guidance and should not be considered to be exact copies. If readers have information on any other clogmakers or an update on that published here, I would be grateful to hear from them.

I would like to thank Trefor Owen, Chris Metherell, Miss Vigeon and Bob Dobson for their information and assistance, and the Manchester District of the E.F.D.S.S. for their encouragement and the publishing of this list.

Great care has been taken to ensure that details printed are as correct as possible, but no responsibility can be held for any inaccuracies that may occur.

D. Broomhead
23 Bray Close
Cheadle Hulme,
Cheshire.

March 1983.

GLOSSARY OF TERMS USED IN THIS LIST.

UPPERS

Without getting too technical the terms are:-

HANDMADE = some degree of handmaking or finishing by the clogmaker

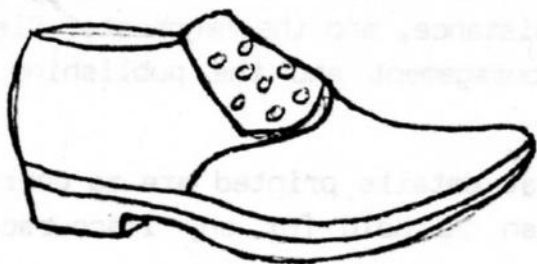

FACTORY MADE = uppers are entirely made by another clogmaker or manufacturer and only need "assembling" onto the sole.

STYLE a general description and alternative names:-

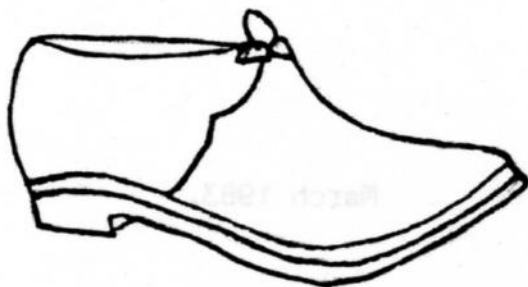

GIBSON/LOW LACE/ LACEUP: A standard Gibson lace up may be 3 or 4 eyelets.

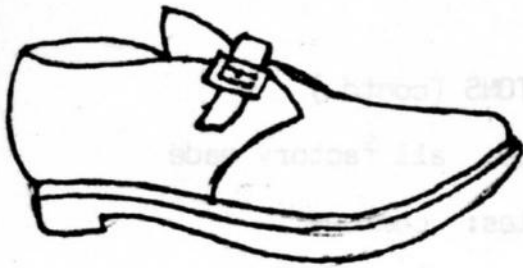

MORRIS/LONGTONGUE: There is some variation on what is considered to be a "morris style" clog. It is sometimes cut higher in the ankle than the Gibson and usually has a long tongue covering the eyelets.

CLASP: A clasp fastens the bridge of the foot - full shoe.

DERSHU/DERBY STRAP/ BUCKLE/ STRAP & TONGUE: Strap and buckle fasten on the side of the instep - full shoe.

BAR [Buckle or Button] STRAP: Fastened by a strap over the instep. Open Shoe.

OTHERS - see catalogues for illustration.

COLOURS

The colour of the upper, these colours might not be available across the whole range of styles.

SOLES

HANDCUT - Soles entirely made by clogmaker

FACTORY - Machine made in a factory

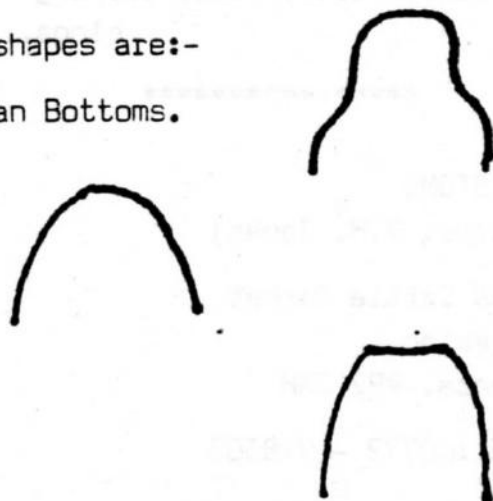

FACTORY RECUT - As name suggest, factory soles, recut and shaped by clogmaker

STYLES - various names for different toe shapes are:-

DUCKS /Duck Bill/ Duck Toe/ Lancashire/ Wigan Bottoms.

COMMONS /Rounds/ Yorkshire Bottoms

SQUARES / London Bottoms.

CRIMP:- This is a pattern usually engraved, but sometimes punched into the upper or tongue either during manufacture or on finishing. Each crimp design is unique to the clogmaker or his family and is considered to be his 'trademark'. Most crimpers will usually adapt their own crimp to suit a customer or even crimp a design or the customers own choice. Examples of crimps are shown

MAIL ORDER - This means that personal visits to the clogmaker are not necessary if certain measurements are sent with the order. These may vary from one clogmaker to another. It does not imply any form of credit facilities.
